Project egg

Diana Stacey

February is a tutorial class for gold foiling on an egg. Diane Stacey has left it open as to what and how much you want to do as far as the different technics being taught. She will bring some supplies to sell for the class or you can bring your own eggs and supplies if you have foil items. As usual, bring your regular eggging tools/glue, etc. So, there really is no fee for the class, the only cost will be for any supplies you might end up purchasing from Diane if you do not already have them.

March Project Class

Those who have not seen it or signed up for it can decide beforehand if they want to do it, and if they do, which one, the red/black egg, or the teal/pink one. Trying to keep the cost at \$20.00. There will be 30 kits, and 17 people signed up in January. One picture shows gold cording but there will be NO cording, just the 12ss flat backs and the bugle beads which will define the space to be filled in with seed beads. Regular eggging tools should be brought in March to start the egg in class. I will already have the eggs painted red or pink but they need to bring a black sharpie or a green or blue sharpie to draw lines for placement of the bugle beads.

The egg has been done 3 different ways to show variations they can do. The unfinished one shows how big spaces will look and before the seed beads go on. It is a very "freestyle" egg. I think this style might be easier for first time beaders since they do not have to worry as much about straightness like with the basket weave. It still has it's challenges though.

Thanks
Laura
